

Algeria Primary Distribution Box

Article Overview

Primary distribution boxes in Algeria are available from specialized suppliers like Electrissima and Alief, offering both indoor and industrial-grade solutions for electrical distribution.

Overview

Primary distribution boxes, also known as distribution panels or switchboards, are essential for safely distributing electricity from a main supply to various circuits in residential, commercial, and industrial settings. In Algeria, these boxes are widely used in industries, utilities, and commercial buildings to connect, protect, control, and measure electrical installations (Electrissima) .

Suppliers and Products

- **Electrissima:** Offers a wide range of distribution boxes and cabinets compatible with ABB products. Their solutions cater to production, transport, and distribution of electricity, suitable for both small businesses and large industrial facilities .
- **Alief:** Provides indoor plastic distribution boxes with supports for LSA strips, available in 30-pair and 50-pair configurations. These are typically used for telecommunication or low-voltage indoor applications .

Types of Distribution Boxes

- **Indoor Plastic Boxes:** Lightweight, suitable for indoor use, often empty and customizable with LSA or other terminal strips .
- **Metal or Industrial Cabinets:** Designed for higher voltage or outdoor applications, providing robust protection against environmental factors and electrical faults .
