

Are network server racks expensive

Overview

The cost of a server rack in the US can range from a few hundred dollars to several thousand, depending on its type, size, and features. When you consider a fully equipped setup, the investment increases significantly due to servers, storage, and networking equipment. These include the size of the installation, the complexity of the equipment, labor costs, and infrastructure requirements. I got a couple \$5k (new) IBM 42U cabinets with locking doors, keys, and PDUs for about \$120 total with zero damage. Granted they weight about 700lbs empty, but well worth it. Entry-level racks, such as small wall-mounted units, typically range from \$200 to \$500.
