

Armored Metal Optical Cable

Overview

An armored optical cable is a type of fiber optic cable reinforced with a protective layer—usually corrugated steel tape (STA) or steel wires (SWA) —to shield the internal fibers from external threats such as crushing, rodent bites, moisture, and harsh installation conditions. This cable is designed for structured cabling systems that carry voice, data and analogue or digital A/V signals. It complies with ISO/IEC 11801, ANSI/TIA-568. This makes the cable strong. ETK Kablo 's Metallic Armored Fiber Optic Cables are engineered for maximum mechanical protection and durability in outdoor, underground, and industrial environments. Compared to ordinary power cables, armored cables can resist.
