

Botswana Vibration Sensing Optical Cable System Manufacturer

Article Overview

Sunita Cables and Paxus are key companies in Botswana involved in manufacturing and supplying optical and telecommunications cables.

Local Manufacturers

Sunita Cables is a leading cable manufacturer based in Gaborone, Botswana. Established in 2003, it was the first company in the country to manufacture electric cables and has since expanded significantly, achieving a 25-fold increase in turnover. Sunita Cables exports to several Southern African countries and offers a range of cable products suitable for telecommunications and industrial applications, which may include vibration-resistant optical cables. Paxus is a fully-fledged telecommunications company operating in Botswana since 2007. While primarily focused on telecommunication works, Paxus provides services including optic fiber installation and civil works, supported by highly trained personnel and advanced equipment. They offer solutions for both copper and fiber optic networks, which can include vibration-resistant optical cable deployment for telecom infrastructure.

International Suppliers Serving Botswana

For specialized vibration optical cables, international suppliers such as Borsan SRL, KYM Cable, and NBG Group provide customized fiber optic products. These companies design, manufacture, and distribute optical cables with specifications suitable for high-performance and vibration-sensitive applications. They often offer single-mode optical fibers and other advanced fiber optic solutions that can be shipped to Botswana.
