

Bulk Procurement of Popular Greek Smart PDUs

Article Overview

Bulk procurement of smart PDUs in Greece is primarily conducted through the ESIDIS platform under Greek public procurement law, with opportunities accessible to both domestic and foreign suppliers.

Procurement Framework in Greece

Greece's public procurement is governed by Law 4412/2016 and subsequent amendments, including Laws 4782/2021, 4912/2022, and 5218/25, which align national procedures with EU directives while introducing national-specific provisions . All public contracts above €2,500 must be published and managed through the National Electronic Public Procurement System (ESIDIS) at promitheus.gov.gr, which handles the full procurement lifecycle: notice publication, document distribution, bid submission, and contract award notification . Above-threshold contracts are also published on TED Europa for EU-wide visibility .

Steps for Bulk Procurement of Smart PDUs

- **Registration and Eligibility** Suppliers must register on ESIDIS and obtain a digital certificate, which may take 2–3 weeks for first-time foreign bidders . Companies must meet technical, financial, and legal eligibility criteria, including ISO certifications recognized under EU or international accreditation agreements .
- **Tender Identification** Relevant tenders for smart PDUs can be found on ESIDIS or aggregator platforms like GlobalTenders and BidDetail, which list live tenders, RFPs, RFQs, and government contracts across Greece . Tenders may be issued by ministries, municipal authorities, hospitals, or infrastructure agencies.
