

CIF price of 100kWh energy storage battery cabinet exported from Russia

Article Overview

The estimated CIF price for a 100kWh commercial lithium battery cabinet exported from Russia ranges from approximately USD 23,500 to USD 49,500, depending on shipping, insurance, and tariffs.

Base System Cost

A 100kWh commercial lithium battery system in 2026 typically costs USD 180–380 per kWh installed, resulting in a total system cost of USD 18,000–38,000. This includes the battery pack (45–55% of total cost), battery management system (BMS), power conversion system (PCS), and the cabinet enclosure .

CIF Pricing Considerations

CIF (Cost, Insurance, and Freight) means the seller covers shipping and insurance to the destination port, with the buyer assuming responsibility after the cargo is onboard . For a 100kWh cabinet exported from Russia, shipping by sea is standard, with delivery times typically 20–35 days depending on the port and logistics arrangements .

Logistics and Tariffs Impact

International shipping and tariffs can significantly affect the final CIF price. Based on industry data, combined logistics costs and tariffs can add roughly 30–35% to the factory price. For example, a base system cost of USD 18,000–38,000 could increase by USD 5,500–11,500 due to freight, insurance, and import duties . Factors influencing this include:
