

Can cable pliers be used to cut fiber optic cables

Overview

Using the correct tools is crucial when working with fiber optic cables. Standard wire cutters or pliers can severely damage the delicate internal fibers. Fiber Optic Strippers: These tools are specifically designed to remove outer jackets and buffer coatings without harming the core fibers. Unlike copper cabling, optical fiber requires precise handling, clean end faces, and accurate measurement to avoid signal loss and performance degradation. Cutting fiber optic cable. The most common fiber optic tools are the following: In addition, the fiber installer's toolkit should also include some standard tools such as needle nose pliers and an electrician's cable knife.
