

# Construction of Lithuanian Telecom Fiber Optic Cable Project

## Overview

The ISRI project is transforming Lithuania's connectivity by installing 1,000 km of fiber optic cables and connecting 1,118 new users. This initiative ensures high-speed, reliable internet access, even in the most remote areas of the country. Lithuania's plan for the ultra-fast broadband development aims to provide 100 Mbps by 2027 to households and public institutions in cities and rural areas. Lithuania's Ministry of Transport and Communications (Susisiekimo ministerija) is responsible for state policy in the area of digital. Our team is actively working on the ISRI project – one of Lithuania's most significant connectivity infrastructure initiatives, aimed at providing modern and reliable broadband internet access across the country. This step was important for the development of a common urban communication infrastructure and, in particular for the. Since year 2003 Skaidula has started a new stage in company's development – the construction of fiber optic cable network and installation of communication cable ducts system. The facility in the village of Rejsztaniszki will cost €26 million (\$30).
