

# Cost of Steel Fireproof Cable Trays in Uganda

## Article Overview

Steel fireproof cable trays in Uganda typically range from \$25 to \$150 per meter depending on type, size, and fire-resistance certification.

### Overview of Cable Tray Types and Fireproof Options

Steel cable trays in Uganda are available in several types, including ladder trays, perforated trays, and solid-bottom trays, each offering different levels of support and protection for electrical cables. For fire-resistant applications, the Legrand P31 range is certified E30/E90 according to DIN 4102-12, ensuring compliance with fire safety standards and suitability for installations in tunnels, commercial buildings, and industrial sites. These trays are designed for high mechanical strength and can accommodate heavy loads.

### Factors Affecting Cost

- **Tray Type and Size:** Ladder trays are generally less expensive than solid-bottom or perforated trays with fireproof coatings. Common dimensions like 100mm x 25mm or 150mm x 50mm influence pricing.
- **Fireproof Certification:** Trays with E30/E90 fire ratings or other fireproof certifications command higher prices due to enhanced safety features.
- **Material and Coating:** Galvanized or powder-coated steel trays are more durable and resistant to corrosion, which can increase cost.
- **Accessories and Installation:** Elbows, bends, tees, supports, and professional installation services add to the overall project cost.
