

Did Tanzania cut the fiber optic cable

Overview

Tanzania and Kenya have officially inaugurated the redundancy route of the National Optic Fibre Cable network at the Horohoro border post, marking a significant advancement in enhancing digital connectivity and promoting regional integration in East Africa. Speaking during the launch, Tanzania's Minister for. This is a list of terrestrial fibre optic cable projects in Africa. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. The submarine cable cutter "Nessie II" is being used between the islands of Rügen and Hiddensee to lay empty pipes 1. The cause of the damage is a suspected dragging ship anchor, a common source of submarine.
