

Fiber Optic Cable Reel Budget

Article Overview

A reel of fiber optic cable typically costs between \$500 and \$18,000, depending on fiber type, strand count, length, and construction.

Pricing Overview

The cost of fiber optic cable varies widely based on several factors:

- **Fiber Type:** Single-mode fiber (OS2) is generally cheaper, ranging from \$0.09 to \$1.52 per foot, while multimode fiber (OM3/OM4) can cost \$1.50 to \$6 per foot due to higher manufacturing complexity and performance requirements .
- **Strand Count:** Higher strand counts increase costs. For example, a 12-strand cable may cost around \$0.50 per foot, whereas a 24-strand cable can reach \$1 per foot, and large backbone cables with 288 strands may exceed \$6 per foot .
- **Cable Construction:** Armored cables for outdoor or harsh environments cost more, typically \$0.50 to \$5 per foot, while indoor riser-rated or plenum-rated cables are less expensive .
- **Length of Reel:** Standard reels range from 500 feet to 10,000 feet. Bulk purchases of 10 km or more can reduce the per-foot cost significantly .

Example Costs

- Small indoor reel (500 ft, single-mode, 12-strand): approximately \$45–\$250.
- Medium outdoor reel (1,000 ft, multimode, armored): approximately \$1,500–\$6,000.
