

Fireproof cable tray prices in Central and African regions

Article Overview

Fireproof cable trays in Africa typically range from \$20 to \$150 per meter depending on material, size, and fire-resistance rating.

Overview of Pricing

The cost of fireproof cable trays varies significantly based on material, design, and structural performance. Common materials include:

- Galvanized steel: Durable and widely used; prices are moderate and suitable for industrial and commercial applications .
- Stainless steel (304 or 316): Higher upfront cost but excellent corrosion resistance and longevity, often used in harsh environments .
- Aluminum alloys: Lightweight and corrosion-resistant, generally mid-range in price .
- Fiberglass-reinforced plastic (FRP) or thermoplastics: Fire-resistant and lightweight, often used in specialized installations . In Kenya, suppliers like PMZ Limited and TDK Tech Store offer cable trays for commercial, industrial, and data center applications, with prices influenced by tray type (ladder, mesh, ventilated, or solid bottom), thickness (0.6mm to 3.0mm), and dimensions (widths 25-100mm, heights 50-600mm, lengths typically 2.44 meters), .
