

Fluke Category 6 Single-Mode Fiber Testing

Overview

This video covers how to setup and run a Fluke Networks SmartLoop™ OTDR Auto test on a pair of single mode fiber. Data centers and enterprises rely heavily on optical fiber cabling to support the exploding demand for bandwidth, so being able to test its quality is critical to maximizing network performance and uptime. Fluke Networks has a wide range of Fiber Optic testing products to help certify that power. The CertiFiber Pro is a duplex tester fiber loss certification tester, capable of testing the optical loss and length of two fibers at a time. The advantage in testing two fibers at the same time is obvious, speed. But how do you test a single/simplex. Whether installing new cable or troubleshooting existing cable, ethernet network and fiber optic cable testing play an essential role in the process. Many organizations often have dark fibers between data centers or operational sites, but. Fiber Testing Best Practices Pocket Guide Time and resources are constantly in demand for enterprises.
