

Georgia Polymer Cable Tray Price Quotation

Article Overview

Polymer (plastic) cable trays in Georgia typically range from \$2 to \$10 per meter, depending on type, size, and supplier.

Price Overview

Polymer cable trays, also known as plastic or halogen-free trays, are generally more budget-friendly than metal alternatives like galvanized steel or stainless steel. The average price per meter ranges from \$2 to \$10, influenced by factors such as tray type (solid, perforated, or wire mesh), load capacity, and surface finish . Bulk orders or project-based purchases can reduce the per-meter cost significantly .

Cost Factors

- **Material:** Plastic trays are lightweight and corrosion-resistant, making them cheaper than steel or aluminum trays .
- **Tray Type:** Ladder trays are stronger and cost more, while perforated or solid polymer trays are less expensive .
- **Size and Length:** Standard lengths are usually 2.4 meters, with fittings priced per piece . Larger or custom sizes may increase costs.
- **Coating and Finish:** While polymer trays do not require galvanization, some may have UV or flame-retardant treatments, slightly increasing the price .
- **Shipping and Installation:** Heavier or bulk shipments may incur higher transport costs, and labor costs vary by region .
