

How long does it take to restart the fiber optic terminal box

Overview

Wait about 10-15 seconds, then turn it back on. Warning: Don't unplug the fibre optic cable connected to the ONT. Rebooting the ONT is similar to rebooting the router, in that it entails disconnecting power to the device, waiting a period of 10-30 seconds for the device to fully power down and then restoring power to it. If your internet and/or phone service is inaccessible, a reboot of the ONT may. An ONT box, also known as an Optical Network Terminal, is a device that converts optical signals from your internet service provider's (ISP) fiber-optic network into electrical signals that your devices can understand. It's usually installed at your home or business by your ISP and serves as the. A quick restart of the devices is a good way to remedy this. The ONT is commonly located next to your utility panel or your Gateway.
