

How much does a galvanized cable tray cost in Tonga

Article Overview

The total installation cost for galvanized steel cable trays in Tonga ranges from \$20 to \$60 per meter, depending on material, type, and installation factors.

Pricing Overview

Galvanized cable trays, commonly used for supporting electrical cables in buildings, vary in price based on material, coating, size, and type. In Tonga, the per-meter cost for steel cable trays, including installation, typically ranges from \$20 to \$60 per meter. This range accounts for both the steel tray itself and additional expenses such as labor, fittings, and shipping.

Factors Affecting Cost

- **Material and Coating:** Hot-dip galvanized (HDG) trays are more durable and corrosion-resistant, costing more than pre-galvanized or cold-galvanized options. Stainless steel and aluminum trays are pricier alternatives.
- **Tray Type:** Ladder-type trays are stronger and more expensive, while wire mesh or perforated trays are lighter and cheaper.
- **Length and Size:** Standard lengths are usually 2.4 meters, and larger or custom sizes can increase costs.
- **Labor and Installation:** Skilled labor, regional wage differences, and installation complexity influence the total cost.
- **Shipping and Handling:** Tonga's remote location may add shipping costs, especially for heavier steel trays.
