

How much does an indoor fireproof cable tray cost

Article Overview

Indoor fireproof cable trays typically cost between \$10 and \$25 per meter, depending on material, type, and fire rating.

Price Range and Factors

The cost of indoor fireproof cable trays varies based on several factors:

- **Material:** Galvanized steel is common and moderately priced, stainless steel offers superior fire and corrosion resistance but is more expensive, and aluminum is lightweight but pricier than steel .
- **Tray Type:** Ladder trays, perforated trays, and mesh trays differ in cost. Ladder trays are stronger and more expensive, while wire mesh or perforated trays are cheaper and suitable for lighter cabling .
- **Fire Rating:** Trays with higher fire resistance, such as those tested to UL 1724, EN 1363-1, or DIN 4102 standards, generally cost more due to specialized coatings or construction .
- **Size and Load Capacity:** Wider trays or those designed to carry heavier loads increase the price. For example, a 150mm wide tray with a 10kg/m load rating may cost more than a smaller, lighter-duty tray .
- **Coatings and Finishes:** Fire-resistant powder coatings, intumescent paints, or mineral-insulated wraps add to the cost but enhance safety and durability .
