

# How much does an outdoor server rack retail

## Article Overview

Outdoor server racks typically retail between \$500 and \$3,000, depending on size, material, and features.

Outdoor server racks, also known as weatherproof or IP-rated enclosures, are designed to protect sensitive IT equipment from environmental hazards such as rain, dust, UV exposure, and temperature extremes . Prices vary widely based on several factors: 1. Size and Rack Units (U):

- Smaller wall-mounted racks (6U-12U) generally start around \$500-\$800.
- Larger floor-standing racks (18U-42U) can range from \$1,000 to \$3,000 or more . 2. Material:

- Galvanized steel, aluminum, or stainless steel enclosures affect cost. Stainless steel models, especially grades 304 or 316, are more expensive due to corrosion resistance and durability . 3. IP/NEMA Rating:

- IP55-rated racks (dustproof and splash-resistant) are common and moderately priced.
- Higher protection levels, such as IP66 (dust-tight and water-resistant), increase the price . 4. Cooling and Ventilation:

- Active cooling with fans, filtered vents, or thermal management systems adds to the cost. Passive ventilation is less expensive but may limit equipment performance in hot climates . 5. Security and Accessories:
