

How much does fiberglass cable tray cost in North Africa

Article Overview

Fiberglass (FRP) cable trays in North Africa typically range from \$10 to \$50 per meter, depending on size, type, resin material, and load capacity.

Overview of FRP Cable Tray Pricing

Fiberglass cable trays, also known as FRP or GRP trays, are valued for their corrosion resistance, lightweight design, fire retardancy, and electrical insulation, making them ideal for harsh environments such as chemical plants, coastal areas, and industrial facilities . Prices vary significantly based on several factors:

- **Tray Type:** Ladder, trough (solid or perforated), and channel trays have different manufacturing complexities. Ladder trays are common for industrial applications, while trough trays are preferred for protecting sensitive cables .
- **Dimensions:** Width, depth, and thickness directly affect material usage. Wider or deeper trays cost more per meter due to increased fiberglass and resin content .
- **Resin Material:** Polyester, vinylester, or epoxy resins influence chemical resistance, fire performance, and durability. Specialty resins for extreme conditions increase costs .
- **Load Capacity:** Trays designed to support heavier cable loads require thicker walls or additional reinforcement, raising the price .
- **Accessories:** Bends, tees, reducers, and brackets add to the total project cost, often exceeding the per-meter price of straight trays .

Price Range in North Africa
