

How to install Huijue optical modules

Article Overview

Install Huijue optical modules carefully using anti-static precautions, proper alignment, and gentle insertion to ensure secure and safe operation.

Preparation and Safety

- **Anti-Static Measures:** Wear an ESD wrist strap or anti-static gloves and ensure proper grounding to prevent electrostatic damage to the module and equipment .
- **Dust Protection:** Keep dust plugs on unused optical ports and on the module itself until ready to connect .
- **Inspection:** Check the module for scratches, dents, or deformations, and verify that the serial number and label match your network requirements .
- **Environment:** Install in a clean, dust-free area with controlled temperature and humidity .

Installation Steps

- **Remove Dust Plugs:** Take off the dust plug from the optical port and keep it for future use .
- **Align the Module:** Ensure the optical module is correctly oriented with the port. Hold the module by its sides, avoiding contact with the edge connector .
- **Insert Gently:** Push the module horizontally into the port until you hear a click or feel it seat securely. Do not force the module; if it does not fit, rotate it 180 degrees and try again .
- **Verify Installation:** While keeping the handle or latch closed, gently pull the module. If it does not come out, it is installed correctly .
