

How to power Huawei fiber optic AP panel with network cable

Overview

Insert the phoenix connector into the DC power port on the device, and connect the fiber connector to the optical module.) To power an AP using a non-standard PoE adapter, ensure that the output power of the adapter supports the maximum power consumption of the AP. Manuals and User Guides for Huawei AP5030DN Wireless Access Point. View online or. The AP6050DN and AP6150DN support MU-MIMO (4SU-3MU), provide comprehensive service support capabilities, and feature high reliability, high security, simple network deployment, automatic AC discovery and configuration, as well as real-time management and maintenance, which meet network deployment. Before connecting a hybrid cable to the device, separate two power cables (with a 7 mm copper core exposed) from the end of the hybrid cable. Tighten the small screws on the top of the phoenix. A hybrid cable is composed of optical fibers and copper cores. During construction, onsite cable connection is required.
