

How to wire the fiber optic monitoring box

Overview

Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. Fiber termination box is an essential component in fiber optic communication systems that facilitates the routing and protection of fiber optic cables. In addition, the drawer structure also facilitates high-density wiring and good cable management. Proper installation and maintenance of FTBs are essential to ensure the reliability and performance of the network infrastructure.
