

Installation location of network core switch

Overview

Choose a central, well-ventilated location. Use an Ethernet cable to connect the switch's uplink port to one of the LAN ports on your router. This bridges the switch with the internet. Also, we are installing new heavy C9606-R core switches -one in each cabinet- that will be 8 units in each rack (from unit 11-18). So, i am wondering if there is an official document from cisco stating that the core switch should be installed in the bottom of the rack to submit it to the customer. Step 1 Open a web browser and navigate to the Aruba Support Portal at <https://asp>. Ensure that the following sections are read and understood carefully before the switch is installed. PoE Switch. Shouldn't I place the switch on the ceiling downstairs so I'll be able to have WIFI downstairs, in my basement, and on the other side upstairs as well?

Have you looked at something like eero?

Not sure if it's available where you are, but this is much simpler than having to mount switches and run.
