

Intelligent devices in power distribution boxes

Overview

An Intelligent Power Distribution Unit (iPDU), also known as a Smart PDU or Intelligent PDU, is a critical component in modern data center infrastructure. iPDUs serve as a centralized power management solution that enhances the efficiency, reliability, and monitoring capabilities.

- High-reliability HPLC: Power services are carried on power lines. Fast and reliable access of transformer district devices
- 15-minute real-time line loss analysis
- Unable to locate faults accurately->quick and accurate fault locating
- Distributed PV should be connected to power grids as much. Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4.0 are phenomenon which are changing the world we are living in. To answer the most demanding market. Our intelligent and mechanical boxes in the area of power and data distribution offer modular solutions for all voltage levels and at the same time optimize functionality - for maximum efficiency with maximum safety. As a pioneer of the power and data distribution of the future, LEONI always keeps. CHINT provide one-stop Intelligent Power Distribution Solutions solutions. These innovations improve system reliability, safety, and operational efficiency by enabling real-time monitoring.
