

Kenya has several major fiber optic cables

Article Overview

Fiber optic cables in Kenya are widely available for both indoor and outdoor networking, with options including single-mode and multimode cables from multiple suppliers.

Types of Fiber Optic Cables

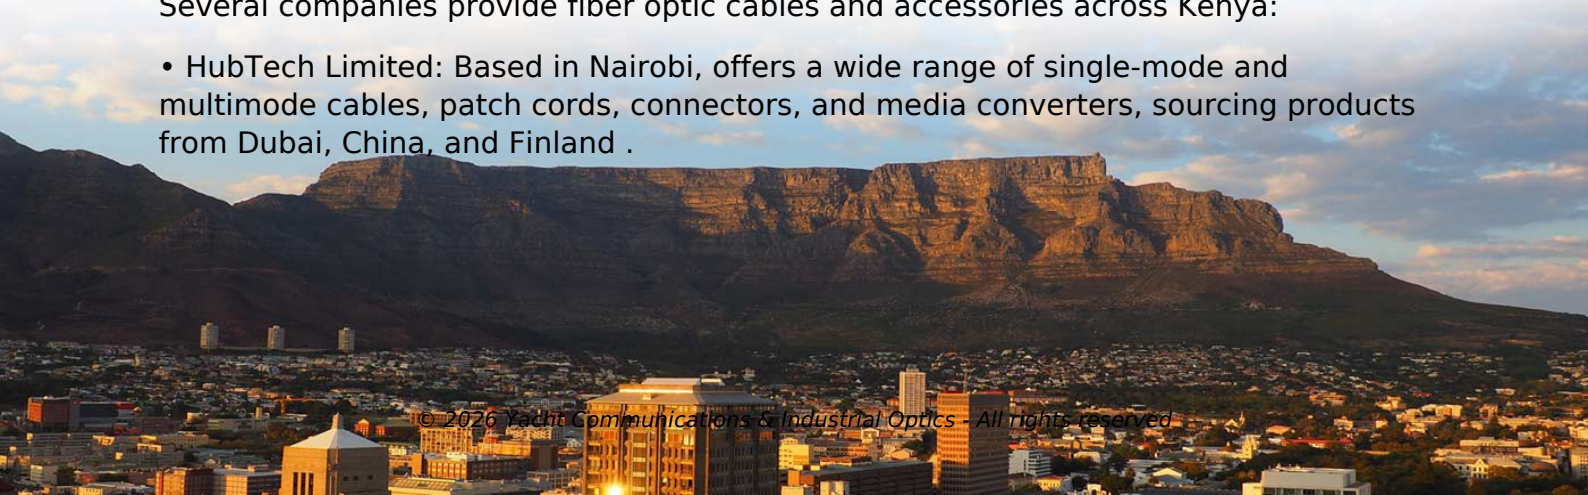

Kenya offers a variety of fiber optic cables suitable for different applications:

- **Single-Mode Fiber (SMF):** Has a narrow core allowing a single light mode to propagate, ideal for long-distance communication and high-speed internet networks .
- **Multi-Mode Fiber (MMF):** Features a wider core that supports multiple light modes, suitable for shorter distances and local area networks .
- **Indoor vs Outdoor Cables:** Indoor cables are designed for office or building installations, while outdoor cables, including ADSS (All-Dielectric Self-Supporting) and underground variants, are built to withstand harsh weather and environmental conditions .

Key Suppliers in Kenya

Several companies provide fiber optic cables and accessories across Kenya:

- **HubTech Limited:** Based in Nairobi, offers a wide range of single-mode and multimode cables, patch cords, connectors, and media converters, sourcing products from Dubai, China, and Finland .
