

Lebanon offers free enterprise-grade 400G optical routers

Article Overview

Lebanon offers enterprise-grade 400G optical networking equipment through local suppliers, but these devices are commercially sold rather than provided for free.

Availability and Suppliers

OptiLink is a leading Lebanese supplier of enterprise-grade fiber connectivity, including 400G QSFP-DD optical modules compatible with Cisco, Arista, Juniper, Huawei, and MikroTik equipment . Every unit is individually tested and pre-coded for plug-and-play compatibility, ensuring reliability for data centers and ISP networks. OptiLink emphasizes local support, fast delivery, and adherence to OEM specifications, making it a trusted regional partner for high-capacity optical networking .

HI-GAIN also supplies enterprise and carrier-class routers in Lebanon, including MikroTik CCR series and Ubiquiti EdgeRouter and UniFi devices . While these routers support high-speed networking and advanced protocols like BGP, MPLS, and PPPoE, they are commercially sold with local warranty and pre-configuration services available .

Fiber Infrastructure Context

Lebanon is actively expanding its fiber-optic network, with over 325,000 households expected to benefit from the FTTH rollout within 16–24 months . This expansion increases demand for high-capacity routers and optical modules, making enterprise-grade 400G equipment increasingly relevant for ISPs and large-scale deployments .
