

Mali Telecom Fiber Optic Cable

Overview

As part of the project, Mali will deploy 817km of fibre optic networks, including 420km of Mopti-Gao path, 199km of Mopti- koro-bi path (bordering burkina faso), 198km of Gao-Labazenga path (bordering Niger) and 100km of fibre to the home (FTTH) network. 6Wresearch actively monitors the Mali Fiber Optics Cable Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. Our insights help businesses to make data-backed strategic decisions with ongoing market dynamics. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. The Malian government seeks to strengthen the national telecom infrastructure as part of its digital transformation ambitions. The aim is to gradually include the 65% of the population who, according to DataReportal data, still lack access to the Internet. The Malian government has initiated a. Mali's government has reportedly contracted China International Telecommunication Construction Corporate to extend the country's national fibre-optic network. According to Agence Ecofin, the work will be carried out as part of a USD117.
