

Netherlands 96-core fiber optic distribution frame

Overview

Designed by Fenxi Optoelectronics Technology, this distribution frame integrates fiber termination, splicing, storage, and distribution into a single standardized platform, helping ensure stable signal transmission and efficient network operation. The ODF Fiber Optic Distribution Frame LC/UPC-96core is a high-density optical fiber management solution developed for telecommunications operators, system integrators, and FTTH network projects. It acts as a distribution point for fiber-optic cables in a central office, data center, or other communication. This fiber optic distribution frame is a high-capacity, high-density fiber distribution frame designed for the termination, connection, distribution, and management of optical fibers in access networks, enabling efficient fiber routing and scheduling. It is 4U height for 96 fibers connection and distribution. With the increasing degree of network integration.
