

Pre-formed end-butterfly fiber optic cable quick connector

Overview

Fibconet presents the Fast Connector, a proprietary solution designed for FTTH applications, delivering factory-direct pricing and superior performance. Pre-Embedded Fiber: Uses pre-embedded fiber with factory-polished ends and built-in refractive index matching gel for enhanced. Butterfly-shaped optical fiber cables, also known as ribbon fiber optic cables, are a type of fiber optic cable that contains multiple fibers within a single flat ribbon. This design allows for easy installation and termination, as multiple fibers can be spliced or connected at once. 20pcs or 100pcs/pack with our fiber cutting tools. The Connector is made with precision PEI V-groove and High quality Zirconia ferrules and provides a highly reliable connection in most of the network. FASTConnect® field-installable connectors are factory pre-polished connectors that completely eliminate the need for hand polishing in the field.
