

Price of Flame-Retardant Cable Trays in El Salvador

Article Overview

Flame-retardant and fireproof cable trays typically range from \$20 to \$150 per meter depending on material, type, and fire rating, with fiberglass and PVC options being common for El Salvador projects.

Material and Type Considerations

- **Fiberglass (FRP) Cable Trays:** Non-metallic, corrosion-resistant, and suitable for outdoor or humid environments. Prices generally range from \$50 to \$150 per meter, depending on ladder, solid-bottom, or channel designs, and load capacity .
- **PVC or U-PVC Trunking:** Flame-retardant and self-extinguishing, ideal for light to medium cable loads. Typical costs are \$20 to \$60 per meter, with variations based on size and fire rating .
- **Metal Fire-Resistant Trays:** Steel or aluminum trays with fireproof coatings or galvanization are more expensive, often \$80 to \$150 per meter, and are used in industrial or high-risk installations .

Fire Rating and Certification

- Fire ratings (e.g., 60, 90, 120 minutes) significantly affect price. Certified products with UL, ETA, or ISO 9001 compliance may cost more but ensure safety and regulatory compliance .
- Flame-retardant trays are designed to limit fire propagation and maintain cable integrity during emergencies, which is critical for commercial, industrial, and public infrastructure projects .
