

Price of Low-Voltage Complete Wiring Switchgear

Article Overview

Low-voltage complete wiring switchgear typically ranges from a few thousand USD for basic panels to over 30,000 USD per modular cell, with costs increasing for customization, automation, and higher ratings.

Price Range and Types

The cost of low-voltage (LV) switchgear varies widely depending on design, configuration, and features. Basic fixed panels start at a few thousand USD, while modular or withdrawable units can exceed 30,000 USD per cell. Fully customized systems with advanced monitoring, automation, or high-rated components can cost significantly more .

Factors Affecting Price

- **Rated Voltage and Current:** Higher voltage or current ratings require more robust components, increasing cost. LV switchgear typically covers 380V to 690V and currents up to 6300A .
- **Configuration Type:** Fixed units are cheapest, modular or withdrawable units cost more but reduce downtime and allow easier maintenance .
- **Automation and Smart Features:** Integration of IoT sensors, smart monitoring, or arc-fault containment can add 15-30% to the base cost .
- **Customization:** Special busbar layouts, coatings, or integrated monitoring can increase the price by 15-50% over standard catalog units .
