

Price of enclosed cable trays in Central Asia

Article Overview

Cable tray prices in Central Asia range from approximately \$0.98 to \$17.80 per meter, depending on material, type, and coating.

Pricing Overview

- **Galvanized Steel Cable Trays:** Standard and heavy-duty galvanized steel trays, commonly used in industrial and oil & gas applications, are priced between \$0.98 and \$10.00 per meter, with higher costs for powder-coated or stainless steel variants (SS304/SS316) due to enhanced corrosion resistance and durability .
- **Aluminum Cable Trays:** Lightweight and corrosion-resistant aluminum trays, often used in renewable energy projects like solar and wind farms, range from \$0.80 to \$17.80 per meter, depending on alloy and dimensions .
- **Plastic Cable Trays:** Budget-friendly plastic trays are suitable for lighter loads and indoor applications, with prices generally lower than metal trays, though exact per-meter costs vary by country and supplier .

Factors Affecting Prices

- **Material Type:** Steel, aluminum, stainless steel, and plastic have different base costs and durability characteristics.
- **Coating and Finish:** Hot-dip galvanization (HDG), powder coating, and pre-galvanized finishes influence both longevity and price. HDG is more expensive but offers superior outdoor performance .
