

Price of repairing a half-open cable tray

Article Overview

Repairing a half-open cable tray typically costs between \$50 and \$250 per meter, depending on material, labor, and complexity.

Material Costs

The cost of the tray itself depends on the material:

- Steel trays: \$5–\$25 per meter, durable and widely used in general environments .
- Aluminum trays: \$6–\$30 per meter, lightweight and corrosion-resistant, ideal for outdoor or industrial settings .
- FRP trays: \$10–\$50 per meter, suitable for aggressive chemical or humid environments .
- Stainless steel trays: Highest durability and corrosion resistance, used in heavy-duty or high-demand environments . Repairing a half-open tray may involve replacing damaged sections or reinforcing the tray, so material costs will vary based on the length and type of tray affected.

Labor Costs

Labor is often the largest component of repair costs. Electricians or technicians typically charge:

- \$40–\$100 per hour for standard electricians, with call-out fees of \$75–\$125 .
