

# Price quote for a 200kW off-grid hybrid energy system

## Article Overview

The estimated cost for a 200kWh off-grid hybrid energy system ranges from approximately \$30,300 to \$36,600, or \$151.5–\$183 per kWh installed, depending on configuration and supplier.

### System Overview

A typical 200kWh off-grid hybrid system includes:

- **Battery Storage:** 200kWh lithium iron phosphate (LFP) batteries with 6000+ cycles and 90% depth of discharge, supporting daily operation for around 15 years (SOLARTODO)
- **Inverter/PCS:** 100kW bidirectional inverter with >96% efficiency and sub-200ms response for stable off-grid operation
- **Solar Integration:** Supports up to 150kW of solar PV, enabling daytime solar energy to be stored and used during evening or night
- **Generator Compatibility:** Hybrid operation with diesel generators to reduce runtime and improve efficiency
- **Safety Features:** Liquid cooling, gas detection, and three-tier fire suppression for industrial-grade reliability This configuration is suitable for remote mining sites, industrial loads, or off-grid communities, providing stable power and reducing diesel consumption by 20–45% .
