

Price quote for standard fireproof cable trays

Article Overview

Fireproof cable trays typically range from \$50 to \$300 per meter depending on material, fire rating, and supplier, with exact quotes available directly from manufacturers or distributors.

Pricing Overview

The cost of fireproof cable trays varies significantly based on material, fire resistance rating, and design:

- **Material:** Steel trays are strong and durable, generally mid-range in price. Aluminum trays are lighter but slightly more expensive. Fiberglass or FRP (Fiber Reinforced Polymer) trays offer excellent corrosion and fire resistance and can be at the higher end of the price spectrum .
- **Fire Rating:** Trays are tested for durations such as 30, 60, 90, or 120 minutes under standards like UL, BS, IEC, or DIN 4102-12. Higher fire ratings typically increase cost .
- **Design and Size:** Molded trays, basket trays, and hybrid designs with fire-retardant coatings or embedded sensors may carry premium pricing .
- **Supplier and Region:** Prices vary by supplier location. Asia-Pacific, particularly China, dominates manufacturing and often offers competitive wholesale pricing, while North America and Europe may have higher costs due to stricter compliance and retrofit projects .

Typical Price Ranges

- **Standard steel fireproof trays:** \$50–\$120 per meter
