

Qatar Fireproof Cable Tray Specifications

Article Overview

Fireproof cable trays in Qatar are available in pre-galvanized steel and fiber-reinforced plastic (FRP) with various fire ratings, corrosion resistance, and configurations suitable for industrial, commercial, and high-rise applications.

Materials and Construction

- Pre-galvanized steel is commonly used for standard cable trays, providing durability and grounding capability. Hot-dip galvanization is available on request for enhanced corrosion resistance .
- Fiber Reinforced Plastic (FRP) or fiberglass trays are used in harsh or corrosive environments, such as petrochemical, marine, and offshore applications .
- Wire mesh or basket trays are made from high-resistance steel for flexible cable support and easy installation .

Fireproof Ratings

- Concrete wall installations: 3-hour F-rating, 3/4-hour T-rating.
- Gypsum wall installations: 1-hour and 2-hour F-ratings, 0 to 1/2-hour T-ratings .
- These ratings comply with UL-listed systems and international standards such as BS EN 61537:2007 .

Tray Types and Models

- Ladder trays: Ideal for heavy or high-volume cabling with long spans between supports .
