

Quotation for electrical distribution boxes in Cambodia

Article Overview

Electrical distribution boxes in Cambodia typically range from \$10 to \$200 or more, depending on type, material, and capacity.

Price Overview

The cost of electrical distribution boxes varies widely based on material, size, and application:

- **Plastic/PVC Boxes:** Common for residential use, lightweight, and corrosion-resistant. Prices generally start around \$10–\$30 per unit for small single-phase boxes .
- **Metal or SMC/FRP Boxes:** Used for commercial or industrial applications, offering higher durability and protection (IP20–IP66). Prices can range from \$50 to \$200+, depending on the number of circuits, meter slots, and protection features .
- **High-Voltage Metering Boxes:** Specialized boxes for 10kV or medium-voltage applications are more expensive, often exceeding \$150–\$200 per unit .

Factors Affecting Cost

- **Material:** PVC is cheaper than metal or composite materials like SMC/FRP.
- **Protection Level:** Higher IP ratings (IP54–IP66) increase cost due to better dust and water resistance.
- **Capacity:** Boxes designed for multiple meters or circuits cost more.
