

Ranking of the longest optical fiber cables in China

Article Overview

China's longest optical fiber cables are primarily produced by YOFC, Hengtong, ZTT, and FiberHome, with individual cable spans reaching tens of thousands of kilometers in total network deployment.

Leading Manufacturers by Production Capacity

- YOFC (Yangtze Optical Fibre and Cable Joint Stock Limited Company) YOFC is China's largest fiber optic cable producer, with an annual capacity of 300 million core-kilometers. Their cables include ultra-low-loss fibers (0.16 dB/km G.654.E) and high-density multi-core cables (up to 576 fibers), supporting submarine cables of 10,000 km spans and high-speed terrestrial networks . YOFC's extensive production and R&D capabilities make it the top contributor to China's longest cable deployments.
- Hengtong Group Established in 1991, Hengtong is a major manufacturer with 11 production bases and a strong focus on submarine and terrestrial cables. They specialize in armored, OPGW, and high-capacity multi-core cables, enabling long-distance deployments for both telecom and energy sectors .
- ZTT (Zhongtian Technology Group) ZTT produces over 3.5 million kilometers of optical cables annually, including single-mode, multi-mode, and specialized underwater and underground cables. Their products comply with international standards and are widely used in long-haul networks and submarine projects .
