

Reset Broadband Fiber Distribution Box

Overview

Press and hold the Reset button on the side (or underneath) of the Openreach modem for 5 seconds. Wait for the power light to come on and stop flashing. While the modem is powered on, use a pin (or similar item) to hold down the reset button for 10-20 seconds until you see all the lights flash at once. Whether you are experiencing slow speeds, intermittent connectivity, or other connection-related problems, this article will guide you on how to reset your fiber internet and get it up and running smoothly again. However, on occasion you may find your NBN FTTC service not performing correctly, sometimes factory resetting the FTTC device will resolve the issue. This guide will walk you through the process. Connection problems can often be solved by 'power cycling' your equipment which just means shutting it down and then switching it back on in a controlled way. Please note that power cycling your Openreach modem will temporarily disconnect your fibre voice. How to restart your nbn™ connection box – for FTTP/FTTC/HFC & Fixed Wireless types Restarting your nbn™ box resolves any temporary device issue that may have impacted your service.
