

South African optical module mounting machine manufacturer

Article Overview

Key South African companies for optical module mounting and assembly equipment include Zetech, Jemstech, and Chromar Technology, offering precision manufacturing, assembly, and technical support.

Zetech Surface Mount Technology

Zetech, established in 1986, supplies industrial and manufacturing equipment for electronics and PCB assembly in South Africa, including precision assembly machinery suitable for optical modules. Their portfolio includes surface mount technology (SMT) machines, wave, reflow, and selective soldering machines, as well as high-definition inspection systems like AOI and X-Ray. Zetech also provides installation, maintenance, training, and process support, making them a strong partner for companies needing optical module assembly solutions .

Jemstech

Jemstech is a leading Electronic Manufacturing Services (EMS) provider in Southern Africa, specializing in precision engineering and high-volume or low-volume production. They offer selective soldering machines and turnkey assembly solutions, supporting both prototyping and full-scale production of electronic and optical modules. Their expertise in precision assembly and process integration makes them suitable for optical module manufacturing .

Chromar Technology
