

# Surface-mounted residential electrical distribution box

## Article Overview

A surface-mounted residential electrical distribution box is a wall-mounted enclosure designed to house circuit breakers or fuses, providing safe and accessible electrical distribution for homes.

### Overview

Surface-mounted distribution boxes are installed directly on the wall surface, making them ideal for retrofits or locations where recessed installation is impractical. They are commonly used in residential, office, and light commercial settings and are designed to meet international safety standards, ensuring reliable protection for electrical circuits .

### Key Features

- **Module Options:** Available in multiple sizes, typically ranging from 2 to 36 modules, allowing flexibility for different circuit requirements . Modular designs, such as those from Panasonic, allow horizontal and vertical expansion to accommodate future upgrades .
- **Protection Ratings:** Standard protection classes include IP30 and IP40, suitable for dry indoor environments. For damp areas like cellars, garages, or bathrooms, specialized damp-room distributors with IP65 protection and injected rubber seals are available .
- **Materials:** Commonly made from impact-resistant plastics such as polycarbonate (PC) or acrylonitrile butadiene styrene (ABS), providing durability and fire resistance .
