

# Surge Protection Power Distribution Box

## Overview

Surge protectors (Surge Protective Devices, SPD) installed in distribution board panels are primarily used to protect electrical equipment from transient voltages (surges or spikes) caused by lightning strikes, power grid fluctuations, or other factors. Depending on the application and protection. Power Distribution, Surge Protectors are in stock at DigiKey. The current ranges from 150 mA to 310 A. These Type 1 and 2 surge protector are ideal for protecting products fed from a panelboard location, as well as high end pieces of equipment such as X-ray machines, CAT scan machines, life support equipment, parking lights and communication systems. Main benefits Offer primary protection against. Low exposure (Category A) at point-of-use equipment Installing appropriately rated surge protection at each location throughout your facility provides a layered defense solution— and helps ensure complete protection of critical equipment. Connecting cables that are too long often lead to problems. Find out about correct installation and how to comply with the required cable.
