

Technical parameters of PDU power distribution unit with remote monitoring

Overview

The Monitored PDU offers real-time power consumption metrics and Email & SNMP alarming for voltage, real power, apparent power, power factor, amperage and kilowatt hours at the rack and via secure web interface. If you're looking for a monitored PDU solution, the Smart PDU from Server Technology offers input current monitoring on an easy-to-view LED, and remote monitoring via network or serial connection login. The Managed PDU comes in. The intelligent metered and controllable rack-mount PDU is an advanced power distribution unit designed specifically for high-density IT environments, including data centers, server rooms, etc. Learn More Vertiv™ PowerIT Switched rack PDUs (rPDU) provide a comprehensive view of critical IT equipment power usage, both at the rack and via remote access with the added ability to remotely turn on, turn. Vertiv™ Geist™ Monitored rack PDUs (rPDU) provide a comprehensive view of power usage, both at the rack and via remote access while continuing to provide reliable power distribution to critical IT equipment. Power status can be monitored over the network, using the CyberPower Management Console and the RJ45 Ethernet port, or locally by using the digital LCD meter.
