

The TPK50 router can be connected via fiber optic cable

Overview

Yes, TP-Link routers can absolutely work with fibre optic internet, but there are a few important things you need to understand about how fibre connections are set up. It's not always as simple as plugging a new router directly into the wall. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. The provided modemrouter has a female optical port (I guess it's called SFP or ONI, I still have to understand that) and all the products I am seeing here have an ethernet WAN port. Instead of a modem, fiber connections require an Optical Network Terminal (ONT), a device that converts fiber signals into an Ethernet connection. Often, your Internet Service Provider ISP will supply a. While the internet connection comes in via fiber optic cable, the device that manages your home network—your router—still needs to be able to communicate with the incoming signal.
