

The router's fiber optic light is constantly on red

Article Overview

A constant red fiber optic light usually indicates a loss of signal or connection issue between your router and your Internet Service Provider (ISP).

Common Causes

- **Loss of Signal (LOS):** The red light often signals that the router cannot communicate with the ISP due to a disrupted fiber optic connection .
- **Fiber Optic Cable Damage:** Physical damage, bends, or cuts in the fiber cable can prevent proper signal transmission .
- **Service Outage:** ISP maintenance or local outages can cause the red light to appear .
- **Loose or Faulty Connections:** Improperly connected cables or damaged connectors can interrupt the signal .
- **Router or ONT Malfunction:** Hardware or firmware issues in the router or Optical Network Terminal (ONT) may trigger a red light .
- **Power Issues:** Fluctuations or insufficient power supply can affect router performance and cause the red light .

Troubleshooting Steps

- **Check for ISP Outages:** Visit your ISP's website or social media pages to confirm if there is a known service disruption .
