

UAE Micro-module Cold Aisle

Overview

Aisle containment no energy loss from cold/hot air mix. High-efficient components include inverter compressors, EC fans, and green refrigerant. Real-time PUE measuring and monitoring. LEGO style standard product modules for easy duplicated management. Local and. To meet evolving IT infrastructure demands and improve energy efficiency, a leading enterprise in Dubai initiated the upgrade of its existing server room by implementing a Cold Aisle modular data center system. The objective was to enhance cooling performance, optimize space utilization, and ensure. The modular cold aisle system is a core component of the micro-module data center, specially designed to meet the development needs of cloud computing, virtualization, centralization, and high-density servers. Essentially creating a room within the aisle, the system helps keep hot and cold air separated to make existing air conditioning systems in data center and edge-of-network.
