

Wall-mounted distribution boxes and complete distribution boxes

Article Overview

Wall-mounted distribution boxes are compact, fixed electrical units for localized power distribution, while complete distribution boxes are fully equipped units designed for broader, centralized electrical management.

Wall-Mounted Distribution Boxes

Wall-mounted distribution boxes are Power Distribution Units (PDUs) designed for quick and simple installation on walls, saving space and installation time . They are typically made from solid rubber, metal, or plastic, offering weather, UV, and ozone resistance, as well as high electrical insulation and durability . These boxes are ideal for localized power distribution in industrial, commercial, or event settings. Features often include:

- Compact design for space-saving installation
- Pre-wired or modular interiors for easy connection
- Protection against moisture and dust, often rated IP44 to IP65
- Quick access to circuit breakers and outlets for maintenance Applications include industrial workshops, events, and decentralized electrical installations, where flexibility and accessibility are important .
