

What are the different shapes and prices of cable tray elbows

Article Overview

Cable tray elbows come in horizontal, vertical, and flexible shapes, made from galvanized steel, stainless steel, or aluminum, with prices starting around \$1.3 per piece.

Types and Shapes

- Horizontal Elbows
 - Used to change cable direction along a horizontal plane (left-right).
 - Common angles: 15°, 30°, 45°, 60°, 90° for smooth transitions.
 - Ideal for routing around corners in industrial or commercial installations .
- Vertical Elbows
 - Guide cables up or down between different levels.
 - Suitable for applications requiring vertical transitions in cable trays .
- Flexible Elbows
 - Adjustable to fit non-standard angles or complex routing paths.
 - Provide versatility in tight or irregular spaces .

Materials

- Galvanized Steel: Strong, durable, and corrosion-resistant; suitable for outdoor or humid environments .
