

What does the exclamation mark on a distribution box mean

Overview

This symbol, standardized by the Globally Harmonized System (GHS) and required by OSHA, guarantees immediate recognition and uniform hazard communication across various environments. Its placement is essential in chemical storage areas, laboratories, and workplaces emphasizing. The exclamation mark hazard symbol, prominently displayed within a red diamond-shaped border, indicates moderate health and physical risks, such as skin irritation, respiratory issues, or narcotic effects from exposure to chemicals or other hazardous substances. It covers six categories of concern: skin and eye irritation, skin sensitization (allergic reactions), harmful acute toxicity, narcotic effects like drowsiness or dizziness, respiratory tract irritation, and. A red-bordered diamond with a bold black exclamation mark is shorthand for “handle with caution. These are universal symbols that help users understand the chemical hazards to which they may be exposed. Below is a. The GHS system, part of OSHA's Hazard Communication Standard (HCS), consists of nine symbols, or pictograms, providing recognition of the hazards associated with certain substances. Use of eight of the nine are mandatory in the U., the exception being the environmental pictogram (see below).
