

What router is best for upgrading fiber optic internet

Overview

To find the best router for fiber internet, we used our expertise to select items based on key specs, such as speeds, coverage, wireless standards, security, weight, and additional features. We conduct in-house testing to check their signal strength, speed, and file. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. In this guide, I'll rank the best routers for fiber internet based on their performance, features, ease of use, and affordability. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. Whether you're streaming, gaming, or working from home.
